**COFFIN SELECTION**

Choosing an appropriate coffin is an important part of the funeral arrangements. We are proud to offer a range of unique coffins and caskets of the highest. Sourced from sustainable producers from around the world, our Forest Stewardship Council certified traditional coffins are constructed from only the finest hand picked veneers and timbers. No two coffins are ever the same. Your choice of coffin is hand made to order, with an emphasis placed on craftsmanship and quality throughout. Our commitment to fair funeral pricing ensures we will provide these exceptional coffins to you at an accessible price.

We are conscious about reducing our environmental impact. We work closely with our coffin supplier, who is the largest producer of Forest Stewardship Council (FSC) certified products in the UK funeral industry. They are committed to recycling first, and ensure that replanting occurs whenever felling takes place. Each year they undergo an audit of their practices to ensure they meet the rigorous standards of compliance the FSC require.
